

Forum Energy Technologies Announces Third Quarter 2016 Results

October 27, 2016

HOUSTON--(BUSINESS WIRE)--Oct. 27, 2016-- Forum Energy Technologies, Inc. (NYSE: FET) today announced third quarter 2016 revenue of \$138 million, a decrease of \$5 million, or 3%, from the second quarter 2016. Net loss for the quarter was \$18 million, or \$0.20 per diluted share, compared to a net loss of \$29 million, or \$0.31 per diluted share, for the second quarter 2016. Excluding \$0.01 per share of special items, the adjusted net loss was \$0.19 per diluted share in the third quarter of 2016.

Special items in the third quarter 2016 included pre-tax charges of \$4 million for restructuring related to facility closures, partially offset by \$3 million of foreign exchange gains. See Tables 1-5 for a reconciliation of GAAP to non-GAAP financial information.

For the first time since 2015, Forum experienced a sequential increase in orders. New inbound orders in the third quarter were \$145 million, a 13% increase from the second quarter 2016, resulting in a book to bill ratio of 104%.

Segment Results

Drilling & Subsea operations focus primarily on manufactured equipment and consumable products for the global drilling and subsea contractors. The segment revenue was \$51 million, an 11% decrease from the second quarter 2016, due to lower demand for drilling and subsea capital equipment, partially offset by a significant increase in sales of drilling consumable products in North America.

The Completions segment revenue was \$34 million, a 37% increase sequentially, as customer spending improved on downhole completion products and pressure pumping consumable equipment. This increased spending was driven by higher drilling activity in the Permian and improved utilization of hydraulic fracturing equipment that accelerated throughout the quarter. This Completions segment designs and manufactures products for the well construction, completion, stimulation and intervention markets primarily in North America.

Production & Infrastructure segment revenue was \$54 million, a 13% decline from the second quarter 2016. This decrease resulted primarily from the completion of an unusually large international refinery project in the prior quarter and softer demand from valves to the midstream gas transmission industry. Forum's U.S. land surface production equipment sales increased 18% in the third quarter. The Production & Infrastructure segment manufactures well site production and process equipment, desalination refinery equipment, and a wide range of valves for the upstream, midstream and downstream oil and gas customers.

Review and Outlook

Cris Gaut, Forum's Chairman and Chief Executive Officer, remarked, "We are beginning to see the impact of improved North America land activity on our business. Forum's U.S. revenue increased 17% sequentially, in line with the improvement in the land rig count. Orders in the third quarter, excluding the Subsea product line, were up 29% sequentially, representing a book to bill ratio of 113%.

"Our cost structure and operational efficiencies allowed Forum to improve operating performance, even with lower revenue during the third quarter.

"With Forum's focus on early cycle, consumable products and activity-based equipment, we are well positioned for the recovery."

Recent Events

Forum received an award from a large independent operator for 100 hydrocarbon separation units to support their well completion activity in the Permian and Eagle Ford basins.

Conference Call Information

Forum's conference call is scheduled for October 28, 2016 at 9:00 AM CDT. During the call, the Company intends to discuss third quarter 2016 results. To participate in the earnings conference call, please call 855-757-8876 within North America, or 631-485-4851 outside of North America. The access code is 91866205. The call will also be broadcast through the Investor Relations link on Forum's website at www.f-e-t.com. Participants are encouraged to log in to the webcast or dial in to the conference call approximately ten minutes prior to the start time. A replay of the call will be available for two weeks after the call and may be accessed by dialing 855-859-2056 within North America, or 404-537-3406 outside of North America. The access code is 91866205.

Forum Energy Technologies is a global oilfield products company, serving the drilling, subsea, completions, production and infrastructure sectors of the oil and natural gas industry. The Company's products include highly engineered capital equipment as well as products that are consumed in the drilling, well construction, production and transportation of oil and natural gas. Forum is headquartered in Houston, TX with manufacturing and distribution facilities strategically located around the globe. For more information, please visit <u>www.f-e-t.com</u>.

Forward Looking Statements and Other Legal Disclosure

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in this press release that address activities, events or developments that the company expects, believes or anticipates will or may occur in the future are forward-looking statements. Without limiting the generality of the foregoing, forward-looking statements contained in this press release specifically include the expectations of plans, strategies, objectives and anticipated financial and operating results of the company, including any statement about the company's future financial position, liquidity and capital resources, operations, performance, acquisitions, returns, capital expenditure budgets, new product development activities, costs and other guidance included in this press release.

These statements are based on certain assumptions made by the company based on management's experience and perception of historical trends, current conditions, anticipated future developments and other factors believed to be appropriate. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond the control of the company, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. Among other things, these include the volatility of oil and natural gas prices, oilfield development activity levels, the availability of raw materials and specialized equipment, the company's ability to deliver backlog in a timely fashion, the availability of skilled and qualified labor, competition in the oil and gas industry, governmental regulation and taxation of the oil and natural gas industry, the company's ability to implement new technologies and services, the availability and terms of capital, and uncertainties regarding environmental regulations or litigation and other legal or regulatory developments affecting the company's business, and other important factors that could cause actual results to differ materially from those projected as described in the company's filings with the Securities and Exchange Commission.

Any forward-looking statement speaks only as of the date on which such statement is made and the company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.

The Company believes that the presentation of EBITDA, adjusted EBITDA, adjusted operating income and adjusted Diluted EPS is useful to the Company's investors because (i) EBITDA is an appropriate measure of evaluating the Company's operating performance and liquidity that reflects the resources available for strategic opportunities including, among others, investing in the business, strengthening the balance sheet, repurchasing the Company's securities and making strategic acquisitions and (ii) each of adjusted EBITDA, adjusted operating income and

(1) repurchasing the Company's securities and making strategic acquisitions and (ii) each of adjusted EBITDA, adjusted operating income and adjusted Diluted EPS is useful to investors to assess and understand operating performance, especially when comparing those results with previous and subsequent periods or forecasting performance for future periods, primarily because management views the excluded items to be outside of the Company's normal operating results. In addition, EBITDA is a widely used benchmark in the investment community. See the attached separate schedule for the reconciliation of GAAP to non-GAAP financial information.

(2) Loss (gain) on foreign exchange, net primarily relates to the translation of U.S. dollar denominated receivables for reporting purposes only and has no economic impact in dollar terms.
