Forum Energy Technologies Acquires SVP Products and Expands Capabilities in the Frac Iron and Flowline Market

HOUSTON, TX – July 7, 2011- Forum Energy Technologies, Inc. (FET) announced today the acquisition of SVP Products Inc., a leading provider of high pressure flow control equipment and products utilized in hydraulic fracturing and flow back of oil and gas wells. The company sells Forum's Wood Flowline and Phoenix product lines, including swivels, plug valves, relief valves, chokes, pup joints and manifold trailers from three facilities in North, East and West Texas. SVP also performs critical repair and recertification services of these products from its locations as well as from its fleet of mobile units. SVP's customer relationships and service capabilities strengthen Forum's Production and Infrastructure division, which provides completion products, engineered process and production systems, measurement and monitoring systems, construction and field services, and a full range of valve and other flow control products. Terms of the transaction were not disclosed.

Cris Gaut, FET's chairman and chief executive officer, explained the importance of the acquisition. "SVP significantly expands the sales channel and service capabilities for our completion products offering and complements our Wood Flowline and Phoenix completion product offerings. SVP has an excellent reputation in the marketplace for customer service, knowledge and dependability. We are very pleased to partner with Jay Nabors, SVP's founder, and the team at SVP. Our goal is to help expand SVP's business to serve clients across the North American shale plays."

Jay Nabors, President of SVP, commented on becoming part of Forum. "Forum is building a great company with a compelling offering to our pressure pumping customers. We are pleased to become part of an energetic, growing organization."

About FET

Forum Energy Technologies Inc., headquartered in Houston TX., is a global provider of manufactured equipment and applied products to the energy industry. FET's over 2,400 employees provide the products and technologies essential to solving the increasingly complex challenges of the oil and gas industry.
