

For Immediate Release

New Purpose Built Facility in Kirkbymoorside, UK

HOUSTON, TX – August 8, 2011 – Forum Energy Technologies, (FET) announced today the opening of a purpose built facility specifically designed to support a wide range of remote operated vehicles and other subsea equipment. This state of the art building will be used for integration and factory acceptance testing, customer training, and product demonstration.

The facility also has these unique features:

- Customer offices
- Training rooms
- Large test tank suitable for simultaneous testing
- The UK's largest hyperbaric chamber
- Dedicated robotic tooling test area

With more than 500 ROV systems delivered and over fifty years of experience, Forum's wide range of remotely operated vehicles are designed to perform in the world's most demanding subsea environments.

About FET

Forum Energy Technologies Inc., headquartered in Houston, Texas, is a global provider of manufactured technologies and applied products to the energy industry. With over 2,800 employees strategically located throughout the world, FET is well positioned to provide the products and technologies essential to solving the increasingly complex challenges of the oil and gas industry.
